intestinal hyperplasia, retardation by food restriction, 98:387
Alanine uptake by liver plasma membrane vesicles, ethanol effects (rat), 98:429
Albumin
gene regulation in liver disease, 98:197
and total paracentesis, in cirrhosis and ascites, 98:146
Alcohol
albumin and collagen gene regulation, in liver disease, 98:197
and alcoholic beverages, effect on meal-stimulated pancreatic secretion, 98:191
intake, and fibrogenesis and basement membrane formation in alcoholic liver disease, 98:1612
and rectal cancer, acetaldehyde role (rat), 98:406
Algorithm, spontaneous vs. secondary bacterial peritonitis, 98:127
Alkaline phosphatase biosynthesis, during differentiation of colon cancer cell line Caco-2, 98:1199
Alpers, David H., AGA new president, 98:1113
American Gastroenterological Association, Our New President—David H. Alpers, M.D., 98:1113
American Indians, cholelithiasis in, 98:251–c
Amino acids
branched-chain, in hepatic encephalopathy, 98:1395–c
degradation to short-chain fatty acids, lactulose effect in colon, 98:353
of gallbladder mucin protein core (cow), 98:1633
γ-Aminobutyric acid (GABA), brain uptake in hepatic encephalopathy (rabbit), 98:747
5–Aminosalicylic acid, radical scavenger mechanism, clinical support, 98:1162
Ammonia, and carnitine homeostasis, 98:1713–ss
Ampulla of Vater, endoscopy of tumors, 98:539–ss, 1098–ss
Anaphylaxis, intestinal
and chronic antigen exposure (rat), 98:1558
divalent hapten-induced, and macromolecular uptake from stomach (mouse), 98:894
Anastomosis, ileal pouch-anal, oleic acid effects, 98:111
Angina, microvascular, 98:1103–c
Angiodysplasia, colonic, endoscopy of, 98:1386–ss
Angiotensin I and II, colonic, in Crohn's disease, 98:1543
1–Anilino-8–naphthalene sulfonate binding, gallbladder mucin (cow), 98:1633
Animal models of autoimmune gastritis, organ-specific suppressor T cells, 98:226
Anions, intestinal secretion, role of interleukins 1 and 3 (chicken), 98:1518
Anorexia nervosa, gastrointestinal symptoms, 98:1415
Antibodies
monoclonal
to human intrinsic factor, 98:607
Mr 40,000 epitope on colon, skin, and biliary epithelium, 98:464
monomeric IgM, to hepatitis delta virus, 98:1582
Antigens
activation, in $CD8^+$ T lymphocytes in viral chronic active hepatitis, 98:1029
chronic exposure, and intestinal anaphylaxis (rat), 98:1558
hepatitis B surface and core, cell surface expression in fibroblast cells, 98:968
leukocyte B8, in autoimmune chronic active hepatitis, 98:1587
X, in hepadnavirus infections, 98:1071
Antioxidants, and drug metabolism in chronic pancreatitis, 98:766
Apolipoprotein A-IV, and dietary fat content, 98:17
Arbaprostil, in arthritics with ASA/NSAID gastric mucosal damage, 98:1549
Arthritis, ASA/NSAID gastric mucosal damage, arbaprostil therapy, 98:1549
Ascites
with cirrhosis, atrial natriuretic factor in, 98:1063
diagnostic paracentesis, 98:230
polymorphonuclear cells, in bacterial peritonitis, 98:134
total paracentesis with albumin, 98:146
Aspirin
and gastric mucosa
analysis with phospholipid-selective cytochemical stain (dog), 98:592

KEY TO ABBREVIATIONS

ar–audiovisual review
br–book review
c–correspondence
cc–clinical conference
cr–case report
ctt–clinical trends and topics
e–editorial
hs–historical series
pa–progress article
ra–review article
ss–selected summary

fish oil effects on prostaglandins, 98:586
and gastric prostaglandins (monkey), 98:284
and NSAID damage, in arthritics, arbaprostil therapy, 98:1549
Atrial natriuretic factor
in cirrhosis with ascites, 98:1063
in early cirrhosis, 98:245–ss
in large intestine (rat), 98:647
Atropine
in feedback control of pancreatic secretion (rat), 98:437
and gastric and pancreatic secretion (dog), 98:47
Autoimmunity, gastritis, and organ-specific suppressor T cells, 98:226

Bacteria
chemotactic peptides, colitis induced by (rabbit), 98:929
killing, phospholipase role, 98:1369
translocation, 98:243–ss
intestinal overgrowth
diagnosis by jejunal culture and breath testing, 98:302
hepatic inflammation (rat), 98:414
Balloon dilatation
of biliary strictures, 98:1089–ss
of esophagus, cerebral electrical potentials evoked by, 98:662
of intestine, perception and reflex relaxation of stomach, 98:1193
rectosigmoid, in irritable bowel syndrome, 98:1187
Basement membranes, and intestinal epithelial cell differentiation (rat), 98:322
Benzocaine endoscopy spray, methemoglobinemia from, 98:211–cr
Bicarbonate
duodenal
and brain peptides, 98:1728–c
mucosal secretion, 98:867
in pH regulation in antral mucosa exposed to luminal acid (Necturus), 98:901
Bile
formation, secretin effect, 98:1393–c
metastability in cholesterol gallstones formation, role of proteins and lipids, 98:739
Bile acids
absorption by small intestine, effects of ursodeoxycholic and chenodeoxycholic acids, 98:424
cholylsarcosine transport and metabolism (rabbit, hamster, rat), 98:163
endogenous and radiolabeled, excretion in idiopathic chronic diarrhea, 98:1036
6–hydroxy substitution, and cholesterol gallstone formation (hamster), 98:397
metabolism, ursodeoxycholic acid effect in biliary cirrhosis, 98:1090–ss
sodium-dependent transport in ileum, diarrhea vs. constipation, 98:25
ursodeoxycholic acid and taurine effects in chronic hepatitis, 98:1044
Bile duct
epithelial cells, endocytosis of epidermal growth factor, 98:1284
and pancreatic duct sphincters (cat), 98:758
and skin and colon, shared Mr 40,000 epitope, 98:464
stones
ESWL therapy, 98:537–ss, 1096–ss
with ultrasonography, 98:726
follow-up after duodenoscopic sphincterotomy, 98:1008
Bile salts
dissolution, and gallstone recurrence, 98:241–ss
micelle-forming, and pigment formation (rat), 98:444
Biliary cirrhosis
asymptomatic
primary, survival rates, 98:1567, 1707–e
risk factors, 98:538–ss, 1097–ss
and hypercholesterolemia, hyperviscosity syndrome, 98:1351–cr
after liver transplantation, 98:1106–c
secondary, after graft-versus-host disease, 98:223
Biliary fibrosis, procollagen expression in nonparenchymal liver cells (rat), 98:175
Biliary tract
cholesterol saturation, reduction by lovastatin and ursodeoxycholic acid, 98:1572
gallbladder stone fragments in feces after extracorporeal shock-wave lithotripsy, 98:1620
and pancreatic reflux, in alcoholic pancreatitis, 98:1051
prostaglandin inhibitor of disease, 98:240–ss
stricture dilatation, 98:1089–ss
Biopsy
esophageal, esophagitis and gastroesophageal reflux in infants, 98:1408
liver, and liver function tests, 98:797–ss
Biotin, transport regulation, 98:242–ss
Bleeding, gastrointestinal, flexible sigmoidoscopy and air contrast barium enema vs. colonoscopy, 98:855
Blood degradation to short-chain fatty acids, lactulose effect in colon, 98:353
Blood flow
in cirrhosis, observer variability in echo-Doppler flowmetry measurement, 98:1603
gastric, leukotriene effects on alcohol-induced injury (rat), 98:1178
intestinal, fructose 1–6 diphosphate prevention of ischemic reperfusion injury (rat), 98:117
portal, hepatic arterial buffer response (cat), 98:1024
splenic and superior mesenteric venous, 98:721
Bone marrow transplantation
cytomegalovirus ileitis detected by colonoscopy, 98:1704–cr
jejunal vasculitis with protein-losing enteropathy, 98:1689–cr

Case Reports
Achalasia due to diffuse esophageal leiomyomatosis and inherited as an autosomal dominant disorder. Report of a family study, 98:1358
Acute necrotizing esophagitis, 98:493
Candida-associated diarrhea in hospitalized patients, 98:780
Cessation of *Cryptosporidium*-associated diarrhea in an acquired immunodeficiency syndrome patient after treatment with hyperimmune bovine colostrum, 98:486
Densely calcified gallstone treated successfully with piezoelectric lithotripsy, 98:777
Effects of high in vivo levels of vasoactive intestinal polypeptide on function of circulating lymphocytes in humans, 98:1693
Fetal liver disease may precede extrahepatic siderosis in neonatal hemochromatosis, 98:1699
Glomerulonephritis associated with inflammatory bowel disease. Report of a patient with chronic ulcerative colitis, sclerosing cholangitis and acute glomerulonephritis, 98:786
Histopathology of cocaine hepatotoxicity. Report of four patients, 98:497
Hyperviscosity syndrome in a hypercholesterolemic patient with primary biliary cirrhosis, 98:1351
Improvement in chronic hepatocerebral degeneration following liver transplantation, 98:1079
Isolated cytomegalovirus ileitis detected by colonoscopy, 98:1704
Jejunal vasculitis with protein-losing enteropathy after bone marrow transplantation, 98:1689
Methemoglobinemia as a complication of 20% benzocaine spray for endoscopy, 98:211
Treatment of acute colonic pseudoobstruction (Ogilvie's syndrome) with cisapride, 98:773
Use of endoscopy to treat bronchobiliary fistula caused by choledocholithiasis, 98:490
Cathepsin E, in pancreatic cancer, 98:1655
Celiac disease
diamine oxidase distribution, 98:1493
lymphocytic gastritis, 98:310
plasma cell infiltration of small bowel, 98:250–c
Cell differentiation, in intestinal epithelium, basement membrane components (rat), 98:322
Cell migration, and transit in stomach, misoprostol effects (dog), 98:90
Cell surface, hepatitis B surface and core antigens, in fibroblast cells, 98:968
Cellular immunity, endotoxin effects in obstructive jaundice (rat), 98:478
Cerebral function, after liver transplantation, 98:1079–cr
Cerulein, gallbladder response, loxiglumide effect, 98:1307
Chemotaxis, peptide-induced colitis (rabbit), 98:929
Chenodeoxycholic acid, and small intestinal absorption of bile acids, 98:424
Children and infants
esophagitis and gastroesophageal reflux, 98:1408
rifampin for pruritus in cholestatic liver disease, 98:1013
viral and mycoplasma infections in chronic inflammatory bowel disease, 98:545
Cholangitis
asymptomatic primary sclerosing, progressive disease in, 98:1594
sclerosing, with glomerulonephritis, 98:786–cr
Cholecystitis, prostaglandin inhibitor treatment, 98:240–ss
Cholecystokinin (CCK)
in cepalic phase of gastric and pancreatic secretion (dog), 98:47
and gallbladder contraction (opossum), 98:1299
and gallstone formation, age effects (guinea pig), 98:993
meal-stimulated release, alcohol effects, 98:191
pancreatic protease effect on sodium oleate stimulation (rat), 98:1642
release, and gallbladder sensitivity to, effect of truncal vagotomy, 98:1338

Choledocholithiasis, endoscopy of bronchobiliary fistula, 98:490–cr
Cholelithiasis, in American Indians, 98:251–c
Cholestasis with pruritus, rifampin treatment, 98:1013
Cholesterol
biliary saturation, reduction by lovastatin and ursodeoxycholic acid, 98:1572
gallstones
6–hydroxy substituted bile acid effects (hamster), 98:397
dissolution by methyl *tert*-butyl ether, calcium insoluble debris, 98:1345 by *N*-acetylcysteine, 98:454
protein and lipid role in bile metastability, 98:739
Cholylsarcosine transport, metabolism, and effect on bile acids (rabbit, hamster, rat), 98:163
Chylomicron catabolism, in pancreatitis, 98:1649
Cigarette smoking, and Crohn's disease, 98:1123
Cirrhosis
alcoholic, sexual dysfunction, 98:1730–c
with ascites, atrial natriuretic factor in, 98:1063
atrial natriuretic factor role, 98:245–ss
biliary
asymptomatic, 98:538–ss, 1097–ss
survival rates, 98:1567, 1707–cr
after graft-versus-host disease, 98:223
with hypercholesterolemia, hyperviscosity syndrome, 98:1351–cr
ursodeoxycholic acid effect on bile acid metabolism, 98:1090–ss
gastroesophageal endoscopy, observer variability, 98:156
portal flow, observer variability in echo-Doppler flowmetry measurements, 98:1603
ritanserin effects on portal pressure (rat), 98:141
total enteral nutrition, 98:715
total paracentesis with albumin, 98:146
variceal hemorrhage, prevention by propranolol, 98:185
Cisapride, for Ogilvie's syndrome, 98:773–cr
Clinical Studies
activation antigen on $CD8^+$ T lymphocytes in viral chronic active hepatitis, 98:1029
alcohol and alcoholic beverages, and meal-stimulated pancreatic secretion, 98:191
algorithm for spontaneous vs. secondary bacterial peritonitis, 98:127
ambulant recording of small bowel motility in irritable bowel syndrome, 98:1208

ascitic fluid polymorphonuclear cells, in bacterial peritonitis, 98:134
atrial natriuretic factor in cirrhosis with ascites, 98:1063
bile metastability in cholesterol gallstones formation, role of proteins and lipids, 98:739
bleeding peptic ulcers, comparison of laser, heater probe, and endoscopic therapy, 98:1239
bowel dysfunction in multiple sclerosis, 98:1538
carbohydrate, fat, and protein effects on somatostatin-28 release, 98:633
cerebral electrical potentials from balloon distention of esophagus, 98:662
chylomicron remnant catabolism in pancreatitis, 98:1649
cigarette smoking in Crohn's disease, 98:1123
colonic mucosal angiotensin I and II in Crohn's disease, 98:1543
colorectal adenomas in Lynch syndromes, 98:1117
Crohn's disease, prednisolone therapy, 98:811
cytomegalovirus infections in liver transplantation, 98:1326
deglutitive glottic closure and oropharyngeal swallowing, 98:1478
diabetic retinopathy in pancreatitis, 98:1577
diamine oxidase in intestinal disease, 98:1493
drug metabolism in pancreatitis, antioxidant treatment, 98:766
duodenal mucosal bicarbonate secretion, 98:867
duodenoscopic sphincterotomy for duct stones, follow-up study, 98:1008
endogenous and radiolabeled bile acid excretion in idiopathic chronic diarrhea, 98:1036
esophagitis and gastroesophageal reflux in infants, 98:1408
extracorporeal lithotripsy with sonography of bile duct stones, 98:721
factor analysis of irritable bowel syndrome, 98:336
feedback regulation of pancreatic enzymes, 98:1311
fibrogenesis and basement membrane formation in alcoholic liver disease, 98:1612
flexible sigmoidoscopy and air contrast barium enema vs. colonoscopy for gastrointestinal bleeding, 98:855
gallbladder stone fragments in feces after extracorporeal shock-wave lithotripsy, 98:1620
gallbladder volume and emptying in large people, 98:1000
gallstone recurrence after shock-wave therapy, 98:392
gastric acid hypersecretion in refractory gastroesophageal reflux disease, 98:654
gastric cancer, clinical and morphological characteristics, 98:708
gastroduodenal motility during gastric emptying induced by cold stress, 98:1155
gastroesophageal endoscopy in cirrhosis, 98:156
gastrointestinal symptoms in anorexia nervosa, 98:1415
gastrointestinal tract in mixed connective tissue disease, 98:1232
hemochromatosis in homozygous subjects, 98:1625
hepatic expression patterns of hepatitis B virus surface proteins, 98:1017
hepatocellular carcinoma resection, 98:733
histamine metabolism in gastric mucosa, pentagastrin effect, 98:921
ileal triglycerides, and gastroduodenal motility and intragastric distribution of solid meal, 98:568
innervation of colonic smooth muscle in Crohn's disease, VIP levels, 98:1437
irritable bowel syndrome during menstruation, 98:1485
isoniazid-rifampin-induced hepatitis in HBV carriers, 98:502
jejunal secretion of histamine in Crohn's disease, 98:849
leukocyte antigen B8 in corticosteroid-treated autoimmune chronic active hepatitis, 98:1587
liquid vs. solid diet effects on colonic transit, 98:73
lovastatin and ursodeoxycholic acid, reduction of biliary cholesterol saturation, 98:1572
low-sodium solution for gastrointestinal lavage, 98:11
loxiglumide effect on gallbladder response to cerulein and food, 98:1307
lymphocytic gastritis in celiac sprue, 98:310
manometry and radiology of esophageal motility disorders, 98:626
metronidazole-induced pancreatitis, 98:1702
monomeric IgM antibodies to hepatitis delta virus, 98:1582
National Polyp Study, dysplasia in colorectal adenomas, 98:371
observer variability in echo-Doppler flowmetry measurements in cirrhosis, 98:1603
oleic effects after ileal pouch-anal anastomosis, 98:111
omeprazole vs. ranitidine for duodenal ulcers, 98:278

PEG 400 probe of intestinal permeability, 98:39
perception and reflex relaxation of stomach in intestinal distention, 98:1193
point mutations of *ras* oncogenes in gastric cancer, 98:955
postprandial colonic transit and motility in constipation, 98:686
progastrin in Zollinger-Ellison syndrome, 98:1420
progressive disease in asymptomatic primary sclerosing cholangitis, 98:1594
propranolol prevention of variceal hemorrhage in cirrhosis, 98:185
psychosocial factors in irritable bowel syndrome, 98:293
radical scavenger mechanism of 5–aminosalicylic acid, 98:1162
rectosigmoid distention in irritable bowel syndrome, 98:1187
rectosigmoid motility in irritable bowel syndrome, effects of dietary fiber, 98:66
reflux esophagitis in Zollinger–Ellison syndrome, 98:341
rifampin for pruritus in cholestatic liver disease, 98:1013
serotonin and 5–hydroxyindoleacetic acid in sigmoid colon in severe idiopathic constipation, 98:1219
small bowel bacterial overgrowth, diagnostic tests, 98:302
somatostatin effects on gallbladder volume and intestinal motility, 98:316
splenic and superior mesenteric venous circulation, 98:721
surface hydrophobicity of gastric mucosa in peptic ulcer disease, 98:1250
survival rates in asymptomatic primary biliary cirrhosis, 98:1567
T-cell activation in Crohn's disease, interleukin-2 receptors, 98:639
total enteral nutrition in cirrhosis, 98:715
total paracentesis with albumin in cirrhosis and ascites, 98:146
transferrin receptor in duodenal mucosa in iron overload, 98:976
truncal vagotomy effects on CCK release and gallbladder emptying, 98:1338
ursodeoxycholic and chenodeoxycholic acid effects on bile acid absorption in intestine, 98:424
viral and mycoplasma infections in chronic inflammatory bowel disease, 98:549
water contamination and esophageal cancer, 98:1141

Cobalamin
binding, in human intrinsic factor, 98:607
of food, transfer to R binder of saliva and gastric juice, 98:1460
transport, in Caco-2 monolayers, 98:1272

Cocaine hepatotoxicity, 98:497–cr

Cold stress, gastric emptying induced by, gastroduodenal motility, 98:1155

Colitis
acetic-acid induced, misoprostol protection of mucosa (rat), 98:615
chemotactic peptide effects (rabbit), 98:929
inflammatory, thromboxane and eicosanoid synthesis (rat), 98:269
ulcerative. *See* Ulcerative colitis.

Collagen
gene regulation in liver disease, 98:197
procollagen expression by nonparenchymal liver cells in biliary fibrosis (rat), 98:175

Colon
angiodysplasia, endoscopy of, 98:1386–ss
angiotensin I and II, in Crohn's disease, 98:1543
cancer
mucin carbohydrates, 98:1170
phthalocyanine photodynamic therapy (rat), 98:1532
sodium chloride transport (mouse), 98:1502
tumor-infiltrating lymphocytes, 98:259
electrolyte transport, *Entamoeba histolytica* effects, role of prostaglandins and calcium (rat), 98:873
epithelium, insulinlike growth factor receptors, 98:703
Golytely preparation, 98:1393–c
innervation of circular smooth muscle, in Crohn's disease, VIP levels, 98:1437
motility, vesical afferent stimulation (cat), 98:1148
postprandial transit, and motor activity in chronic constipation, 98:686
projections of VIP-immunoreactive neurons, 98:819
pseudoobstruction, cisapride treatment, 98:773–cr
short-chain fatty acids, 98:1727–c
sigmoid, serotonin and 5–hydroxyindoleacetic acid, in constipation, 98:1219
and skin and bile duct, shared Mr 40,000 epitope, 98:464
sucrase-isomaltase, 98:1467
transit, liquid vs. solid diet, 98:73

Colonoscopy, cytomegalovirus ileitis detected by, 98:1704–cr

Colorectum
adenomas, in Lynch syndromes, 98:1117
cancer, Hemoccult test in screening, 98:806–c
dysplasia in adenomas, National Polyp Study, 98:371
lesions in seronegative spondylarthropathy, 98:1730–c

Colostrum, hyperimmune bovine, for *Cryptosporidium*-associated diarrhea in AIDS, 98:486–cr

Communicable diseases, *Balliere's Clinical Tropical Medicine and Communicable Diseases. Diarrhoeal Diseases*, 98:247–br

Complement activation, and epithelial immunoglobulin G1, in ulcerative colitis, 98:1264

bacterial overgrowth hepatic inflammation (rat), 98:414 jejunal culture and breath testing, 98:302
bile acid absorption, effects of ursodeoxycholic and chenodeoxycholic acids, 98:424
breath test for bacterial overgrowth, 98:253–c
brush-border membrane vesicles, 98:676
crypt epithelial cell proliferation and mucosal morphology, T cell stimulation, 98:1255
developing, glycosylation of lactase-phlorizin hydrolase (rat), 98:667
epidermal growth factor uptake and transport in fetus (rat), 98:828
injury-induced inhibition of protein and nucleic acid synthesis (rat), 98:1445
plasma cell infiltration in celiac disease, 98:250–c
reversal of bypass operations, 98:1710–ss
somatostatin effect on motility, 98:316
transferrin receptors (rat), 98:576
Yersinia enterocolitica effects on ultrastructure (rabbit), 98:1401
villus, countercurrent multiplier in (dog), 98:3
vitamin E uptake during lipolysis, 98:96
Intrinsic factor, monoclonal antibodies to, 98:607
Ion transport, in inflamed jejunum (rat), 98:561
Iron
metabolism, hemochromatosis in homozygous subjects, 98:11625
overload, transferrin receptor in duodenal mucosa, in genetic hemochromatosis, 98:976
and transferrin receptors in small intestine (rat), 98:576
Irritable bowel syndrome
ambulant recording of small bowel motility, 98:1208
dietary fiber effects on rectosigmoid motility, 98:66
factor analysis of symptoms, 98:336
during menstruation, 98:1485
psychosocial factors, 98:293
rectosigmoid distention, 98:1187
Ischemia, intestinal, fructose 1–6 diphosphate prevention of reperfusion injury (rat), 98:117
Isoniazid and rifampin, for hepatitis in HBV carriers, 98:502

Jaundice
Hepatic Transport and Jaundice, 98:1720–br
Hepatobiliary Disease and Jaundice (Unit 4), 98:803–br
obstructive, endotoxin suppression of cellular immunity (rat), 98:478
pancreas, prostaglandin production (dog), 98:1292
Jejunum
circular muscle motility, in nematode infection (rat), 98:59
cultural diagnosis, in small bowel bacterial overgrowth, 98:302
histamine secretion in Crohn's disease, 98:849
inflammation, ion transport in (rat), 98:561
vasculitis, protein-losing enteropathy after bone marrow transplantation, 98:1689–cr

Kinetics, vocal cords during oropharyngeal swallowing, 98:1478

L-364,718, and gastric and pancreatic secretion (dog), 98:47
Lactase-phlorizin hydrolase, glycosylation in developing small intestine (rat), 98:667
Lactulose, and colonic short-chain fatty acids, 98:353
Laparoscopy, hepatic candidiasis with perihepatic adhesions, 98:214
Laparotomy, and gastric mucosal protection (rat), 98:249–c
Larynx, oropharyngeal swallowing, and deglutitive glottic closure, 98:1478
Laser, Nd YAG, for bleeding peptic ulcers, 98:1239
Lavage, gastrointestinal, with low-sodium solution, 98:11
Legionella infection in ulcerative colitis, 98:1107–c
Leiomyomatosis, esophageal, achalasia due to, autosomal dominant disorder, 98:1358–cr
Leukemia
biliary cirrhosis, 98:223
hepatic candidiasis, 98:214
Leukocyte antigen B8, in corticosteroid-treated autoimmune chronic active hepatitis, 98:1587
Leukotrienes, and gastric mucosal injuries (rat), 98:1178
Lipids
and bile metastability in cholesterol gallstones formation, 98:739
dietary, and intestinal regeneration (rat), 98:1226
ethanol-induced peroxidation, xanthine oxidase role, (rat), 98:203
in hyperalimentation, and hepatic microsomes (rat), 98:1320
Lipolysis, vitamin E uptake by Caco-2 intestinal cells, 98:96
Lipoproteins
chylomicron remnant catabolism in pancreatitis, 98:1649
and schistosome binding, 98:1712–ss
Lithotripsy
extracorporeal shock-wave
of bile duct stones, with ultrasonography, 98:726
gallbladder stone fragments in feces, 98:1620
gallstone recurrence rate, 98:392
piezoelectric, for densely calcified gallstones, 98:777–cr
Liver
in alcoholic pancreatitis, 98:1051
arterial buffer response to portal blood flow changes (cat), 98:1024
autopsy, peribiliary glands, 98:1333
biopsy, and liver function tests, 98:797–ss
dysfunction, and gastroesophageal endoscopy in cirrhosis, 98:156
enzymes and bile acids, ursodeoxycholic acid and taurine effects in hepatitis, 98:1044
epinephrine synthesis by *N*-methyltransferase (rat), 98:152
expression patterns of hepatitis B virus surface proteins, 98:1017
Hepatic Transport and Jaundice, 98:1720–br
human tissue for research, report from NIH DDDN, 98:1086
inflammation, and intestinal bacterial overgrowth (rat), 98:414
microsomal fluidity and function, hyperalimentation effect (rat), 98:1320
nonparenchymal cells, procollagen expression, in biliary fibrosis (rat), 98:175
plasma membrane vesicles, ethanol effect on alanine uptake (rat), 98:429
ritanserin effects on portal pressure in cirrhosis (rat), 98:141
transplantation
biliary cirrhosis recurrence, 98:1106–c
and chronic hepatocerebral degeneration, 98:1079–cr
and erythropoietic protoporphyria, 98:1726–c
risk factors for cytomegalovirus infection, 98:1326
Liver disease
alcohol- and virus-induced, albumin and collagen gene regulation, 98:197
alcoholic, markers of fibrogenesis and basement membrane formation, 98:1612

asymptomatic primary sclerosing cholangitis, disease progression, 98:1594
candidiasis with perihepatic adhesions, 98:214
cholestatic, with pruritus, rifampin therapy, 98:1013
cocaine hepatotoxicity, 98:497–cr
fetal, and extrahepatic siderosis in neonatal hemochromatosis, 98:1699–cr
hepatic encephalopathy
brain uptake of GABA (rabbit), 98:747
branched-chain amino acids, 98:1395
Hepatobiliary Disease and Jaundice (Unit 4), 98:803–br
hepatocellular carcinoma
prognosis of, 98:1392–c
resection, 98:733
hydatid cysts, aspiration and alcohol injection, 98:1366
The Laboratory Investigation of Liver Disease, 98:1720–br
splenic and superior mesenteric venous circulation, 98:721
Lovastatin, and ursodeoxycholic acid, effects on cholesterol saturation of gallbladder bile, 98:1572
Loxiglumide, and gallbladder response to cerulein and food, 98:1307
Lymphocytes
in gastritis of celiac disease, 98:310
tumor-infiltrating, from human colon carcinomas, 98:259, 531–e
VIP modulation of, 98:1693–cr
Lynch syndromes, colorectal adenomas, 98:1117
Lysine, di-DNP-, anaphylaxis induced by, and gastric macromolecular uptake (mouse), 98:894

M cells, intestinal, poliovirus type 1 entry, 98:56
M1 markers of gastrointestinal epithelial cells, in pancreatic cancer, 98:1655
Magnesium transport, in terminal ileum, interaction with calcium transport (rat), 98:985
Males, estrogen-induced gallstones, 98:800–ss
Manometry
pancreatic and bile duct sphincters (cat), 98:758
and radiology, of esophageal motility disorders, 98:626
Mast cells, in ion transport in inflamed jejunum (rat), 98:561
Membranes
basement, in alcoholic liver disease, 98:1612
liver microsomes, hyperalimentation effect (rat), 98:1320
Menstruation, and irritable bowel syndrome, 98:1485
Mental illness, and colonic motility, 98:1394–c
Methemoglobinemia, from benzocaine spray for endoscopy, 98:211–cr
Methodology
absorption and infrared spectroscopy, biliary pigment formation, and micelle-forming bile salts (rat), 98:444
ambulant recording of small bowel motility, in irritable bowel syndrome, 98:1208
brush-border membrane vesicle preparation, from small intestine, 98:676
colonic transit scintigraphy, liquid vs. solid diet effects on colonic transit, 98:73
echo-Doppler flowmetry, observer variability, portal flow in cirrhosis, 98:1603
enzyme-linked immunosorbent assay (ELISA), X antigen/antibody markers in hepadnavirus infections, 98:1071
fluorescein angiography, diabetic retinopathy in pancreatitis, 98:1577
fluorescence immunocytochemistry, monoclonal antibodies to human intrinsic factor, 98:607
immunofluorescence microscopy or flow cytometry, hepatitis B surface and core antigens in transfected fibroblasts, 98:968
immunofluorescence, sucrase-isomaltase in adult colon and colonic polyps, 98:1467
immunohistochemistry, gastrointestinal epithelial cell markers in pancreatic cancer, 98:1655
infrared spectroscopy, gallbladder stone fragments in feces after extracorporeal shock-wave lithotripsy, 98:1620
microelectrodes, intracellular pH of *Necturus* antral mucosa exposed to luminal acid, 98:901
radioimmunoassay, progastrin in Zollinger-Ellison syndrome, 98:1420
in situ hybridization histochemistry and immunohistochemistry, protooncogenes in regenerating stomach (rat), 98:1535
ulcerative colitis induction (mouse), 98:694
ultrasonography, hydatid liver cyst therapy, 98:1366
video endoscopy and video fluoroscopy, deglutitive glottic closure and oropharyngeal swallowing, 98:1478
Methyl *tert*-butyl ether, gallstone dissolution, 98:1280
1–Methyl-4–phenyl-1,2,5,6–tetrahydropyridine (MPTP), duodenal ulcers induced by, prevention by serotonin and norepinephrine blockers (rat), 98:554
***N*-Methyltransferase**, epinephrine synthesis in liver (rat), 98:152
Metronidazole, pancreatitis induced by, 98:1702
Microscopy
electron
endocytosis of epidermal growth factor in bile duct epithelial cells, 98:1284
gastrinoma cell cultures, 98:936
poliovirus type 1 entry through intestinal M cells, 98:56
Yersinia enterocolitica effects on small intestine (rabbit), 98:1401
electron and light
experimental ulcerative colitis (mouse), 98:694
intestinal anaphylaxis chronic antigen exposure (rat), 98:1558 and gastric macromolecular uptake (mouse), 98:894
peribiliary glands in autopsy liver, 98:1333
immunoelectron, hepatic expression patterns of hepatitis B virus surface proteins, 98:1017
Microsomes, liver, hyperalimentation effect (rat), 98:1320
Migrating motor complex
intestinal, postprandial effects of prostaglandin E analogues (dog), 98:888
and sphincter of Oddi motility (opossum), 98:347
Misoprostol
and cell migration and transit in stomach (dog), 98:90
mucosal protection in colitis (rat), 98:615
Morbidity, hemorrhoids and constipation, 98:380
Morphine, and ethanol-induced gastric mucosal damage (rat), 98:82
Morphology
intestinal
crypt epithelial cell proliferation, T cell stimulation, 98:1255
in enteric cryptosporidiosis (pig), 98:1129
in pancreatitis, stress effects (rat), 98:1682
Mortality rate, total enteral nutrition in cirrhosis, 98:715
Motility
of colon
and mental illness, 98:1394–c
vesical afferent stimulation (cat), 98:1141
esophageal disorders, manometry and radiology, 98:626
of gallbladder
calcium role, 98:801–ss
in large people, 98:1000
gastroduodenal
during gastric emptying induced by cold stress, 98:1155
and ileal triglycerides, 98:568
intestinal, somatostatin effects, 98:316
and postprandial colonic transit, in constipation, 98:686

small intestine, ambulant recording in irritable bowel syndrome, 98:1208
of sphincter of Oddi, translocation of papilla (opossum), 98:347
Mucin
carbohydrates, in colonic cancer, 98:1170
gallbladder, peptide characterization (cow), 98:1633
Multiple sclerosis, bowel dysfunction, 98:1538
Muscle
colonic circular smooth, innervation of in Crohn's disease, VIP levels, 98:1437
jejunal circular, in nematode infection (rat), 98:59
Mycoplasma infections, and inflammatory bowel disease, 98:549

National Polyp Study, dysplasia in colorectal adenomas, 98:371
Necturus maculosus, intracellular pH in antral mucosa exposed to luminal acid, 98:901
Nerves
adrenergic and peptidergic, in submucous plexus of ileum in diabetes (rat), 98:1427
afferent, gastric protection by capsaicin (rat), 98:838
colonic circular smooth muscle, in Crohn's disease, VIP levels, 98:1437
vesical afferents, and colonic motility (cat), 98:1148
Nervous system
central, peptides, and gastrointestinal motor function, 98:517
in stress effects on gastric acid secretion (rat), 98:1490
Neurons
enteric forms, 98:1716–ss
opioid-sensitive afferent, and gastric mucosal damage (rat), 98:82
VIP-immunoreactive, projections in colon, 98:819
Neuropeptide Y, in nerve fibers of submucous plexus of ileum, in diabetes (rat), 98:1427
Neurotensin, after ileal pouch-anal anastomosis, 98:111
Neutrophils, in ethanol-induced injury to gastric mucosa (rat), 98:909
NIH Division of Digestive Diseases and Nutrition
human liver tissue for research, 98:1086
research support, 98:237, 239–e
research training, 98:529
Nonsteroidal antiinflammatory drugs (NSAID)
gastric mucosal damage, in arthritics, arbaprostil therapy, 98:1549
and gastric ulcers and prostaglandin E_2 (rat), 98:1245
Norepinephrine blockers, and MPTP-induced duodenal ulcers (rat), 98:554
Nucleic acids, intestinal, injury-induced inhibition of (rat), 98:1445
Nutrition
refeeding and gastrointestinal symptoms in anorexia nervosa, 98:1415
total enteral, in malnourished cirrhotics, 98:715
total parenteral
diamine oxidase distribution, 98:1493
and enteral, hyperalimentation effect on hepatic microsomes (rat), 98:1320
Nystatin, for *Candida*-associated diarrhea in hospitalized patients, 98:780–cr

Obesity, gallbladder volume and emptying, 98:1000
Ogilvie's syndrome, cisapride treatment, 98:773–cr
Oleic acid, in ileal pouch-anal anastomosis, 98:111
Oligoarthritis, asymmetric, ileocolonoscopy, 98:1105–c
Omeprazole vs. ranitidine, for duodenal ulcers, 98:278
Oncogenes, *ras*, point mutations in gastric cancer, 98:955
Opioid peptides, and gastrointestinal motor function, 98:517
Osmolality, countercurrent multiplier in intestinal villus (dog), 98:3

Pain
in alcoholic pancreatitis, 98:1051
esophageal, 98:250–c
in irritable bowel syndrome, factor analysis, 98:336
Pancreas
acinar cell necrosis and intraductal protein precipitates, hypercalcemia effects (cat, guinea pig), 98:1675
and bile duct sphincters (cat), 98:758
cancer, markers of gastrointestinal epithelial cells, 98:1655
cholinergic control of feedback regulation (rat), 98:437
endocrine tumor, VIP effects on lymphocyte activation, 98:1693–cr
ethanol effects, 98:1051
feedback regulation, protease effects on pancreatic enzymes, 98:1311
gastrin trophic effects (rat), 98:33
heterotopic, in liver at autopsy, 98:1333
inflammatory disease, role of spleen, 98:509
meal-stimulated secretion, effect of alcohol and alcoholic beverages, 98:191
obstructive jaundiced, prostaglandin production (dog), 98:1292
phospholipases, 98:1369
proteases, and sodium oleate-simulation of CCK, secretin, and pancreatic exocrine secretion (rat), 98:1642
secretion, antral mucosectomy, L-364,718, and atropine effects (dog), 98:47
Pancreatitis
alcoholic, 98:1051
chylomicron remnant catabolism, 98:1649
diabetic retinopathy, 98:1577
drug metabolism, antioxidant treatment, 98:766
metronidazole-induced, 98:1702
stress role in development (rat), 98:1682
Paracentesis
atrial natriuretic factor in cirrhosis with ascites, 98:1063
diagnostic, clinical uses, 98:230
total, in cirrhosis and ascites, 98:146
Patient compliance, low-sodium solution for gastrointestinal lavage, 98:3
PEG 400 (polyethylene glycol), intestinal permeability, 98:39
Pentagastrin, and histamine metabolism in gastric mucosa, 98:921
Pentasa, ulcerative colitis treatment, 98:251–c
Peptide YY, after ileal pouch-anal anastomosis, 98:111
Peptides
brain, and duodenal bicarbonate, 98:1728–c
chemotactic, colitis induced by (rabbit), 98:929
CNS, and gastrointestinal motor function, 98:517
from protein core of gallbladder mucin (cow), 98:1633
opioid, and gastrointestinal motor function, 98:517
prepro-VIP induced, and ileal output, 98:505
regulatory, and growth of pancreatic cancer lines PANC-1 and MIA PaCa-2, 98:1666
Perception of gastric relaxation, and intestinal distention, 98:1193
Peritoneoscopy, focal hepatic candidiasis, 98:214
Peritonitis
bacterial
ascitic fluid polymorphonuclear cells, 98:134
spontaneous vs. secondary, algorithm for differentiation, 98:127
diagnostic paracentesis, 98:230
Permeability, intestinal, PEG 400 probe, 98:39
Peroxidation, lipid, ethanol-induced, xanthine oxidase role (rat), 98:203
Petroleum oils, water contamination and esophageal cancer, 98:1141
pH
esophagitis and gastroesophageal reflux in infants, 98:1408

intracellular, in *Necturus* antral mucosa exposed to luminal acid, 98:901
in refractory gastroesophageal reflux disease, 98:654
Pharmacotherapy, of bleeding peptic ulcers, 98:1724–c
Phospholipases, in gastrointestinal physiology, 98:1369
Phospholipids, gastric, aspirin and prostaglandin effects (dog), 98:592
Photodynamic therapy, phthalocyanine, for colon tumors (rat), 98:1532
Phthalocyanine photodynamic therapy, for colon tumors (rat), 98:1532
Pigments, biliary, and micelle-forming bile salts (rat), 98:444
Point mutations, of *ras* oncogenes in gastric cancer, 98:955
Polymorphonuclear cells, of ascitic fluid, in bacterial peritonitis, 98:134
Polyposis, familial, upper gastroduodenal cancer, 98:1092–ss
Polyps
colonic, sucrase-isomaltase in, 98:1467
National Polyp Study, dysplasia in colorectal adenomas, 98:371
Postmortem liver, peribiliary glands, 98:1333
Potassium, countercurrent multiplier in intestinal villus (dog), 98:3
Prednisolone for Crohn's disease, clinical, biological and endoscopic correlations, 98:811
Procollagen, in nonparenchymal liver cells in biliary fibrosis (rat), 98:175
Progastrin, in Zollinger-Ellison syndrome, 98:1420
Propranolol, for variceal hemorrhage in cirrhosis, 98:185
Prostaglandins
and aspirin effects on gastric function (monkey), 98:284
and *Entamoeba histolytica* effects on colonic electrolyte transport (rat), 98:873
in duodenal mucosal bicarbonate secretion, 98:867
E
analogues, in postprandial migrating motor complexes (dog), 98:888
for fulminant viral hepatitis, 98:1088–ss
E2
and F2α, in gastric mucosa, aspirin effects, 98:586
NSAID effects (rat), 98:1245
gastric mucosa, phospholipid-selective cytochemical analysis (dog), 98:592
inhibitor, biliary colic treatment, 98:240–ss
intestinal, and interleukin 1 and 3 effect on anion secretion (chicken), 98:1518
in obstructive jaundiced pancreas (dog), 98:1292
Protein kinase C
and gastric acid secretion, 98:244–ss
MARCKS substrate, 98:1091–ss
Protein-losing enteropathy, and jejunal vasculitis, after bone marrow transplantation, 98:1689–cr
Proteins
and bile metastability in cholesterol gallstones formation, 98:739
cobalamin-binding, in food, cobalamin transfer to R binder of saliva and gastric juice, 98:1460
degradation to short-chain fatty acids, lactulose effect in colon, 98:353
hepatic B virus surface, hepatic expression patterns, 98:1017
intestinal, injury-induced inhibition of (rat), 98:1445
MR 40,000, organ specificity, 98:464
myristoylated and nonmyristoylated, phosphorylation by protein kinase C, 98:1091–ss
and somatostatin-28 release, 98:633
Protooncogenes, in regeneration of stomach (rat), 98:1525
Protoporphyria, erythropoietic, and liver transplantation, 98:1726–c
Pruritus, in cholestatic liver disease, rifampin therapy, 98:1013
Pseudocysts, pancreatic, and splenic complications, 98:509
Psychological symptoms
irritable bowel syndrome during menstruation, 98:1485
and rectosigmoid distention in irritable bowel syndrome, 98:1187
Psychosocial factors, in irritable bowel syndrome, 98:293

R binder, of saliva and gastric juice, cobalamin transfer from cobalamin-binding protein of food, 98:1460
Radiography, of gallstone dissolution, 98:1715–ss
Radioimmunoassay, gastrinoma cell cultures, 98:936
Radiology
gallstone dissolution with methyl tert-butyl ether, 98:1280
Gastrointestinal Radiology, 98:804–br
and manometry, of esophageal motility disorders, 98:626
Radiology of the Esophagus, 98:542–br
Ranitidine
vs. omeprazole, for duodenal ulcers, 98:278
in refractory gastroesophageal reflux disease, 98:654
Receptors
CCK-, and gallbladder emptying (opossum), 98:1299
epidermal growth factor, in gastric carcinoma, 98:961
insulinlike growth factors, in colonic epithelium, 98:703
muscarinic M3, gastric acid secretion (rat), 98:218
phospholipases, 98:1369
Progress in Pharmacology and Clinical Pharmacology, Vol.7, No. 1. Modern Developments in Cholinergic (Muscarinic) Receptors and Drugs, 98:1398–br
transferrin
in duodenal mucosa in iron overload, in genetic hemochromatosis, 98:976
in small intestine (rat), 98:576
Rectosigmoid
distention, in irritable bowel sydnrome, 98:1187
pressure, in irritable bowel syndrome, effect of dietary fiber, 98:66
Rectum, and alcohol-related cancer, acetaldehyde role (rat), 98:406
Research
human liver tissue, 98:1086
support from NIH DDDN, 98:237, 239–e
training in digestive diseases, NIH DDDN report, 98:529
Retinopathy, diabetic, in pancreatitis, 98:1577
Rifampin
and isoniazid, hepatitis in HBV carriers, 98:502
for pruritus in children with cholestatic liver disease, 98:1013
Risk factors
cigarette smoking in Crohn's disease, 98:1123
cytomegalovirus infection in liver transplantation, 98:1326
Ritanserin, and portal pressures in cirrhosis (rat), 98:141
RNA
messenger, albumin and collagen, in liver disease, 98:197
procollagen, in nonparenchymal liver cells, in biliary fibrosis (rat), 98:175

Saliva, R binder, cobalamin transfer from cobalamin-binding protein, 98:1460
Schistosoma, infection, lipoprotein binding, 98:1712–ss
Screening programs, colorectal adenomas in Lynch syndromes, 98:1117
Secretagogues, ileal, additive effects (rat), 98:881
Secretin
and bile formation, 98:1393–c
pancreatic protease effect on sodium oleate stimulation (rat), 98:1642
Selected Summaries
Acid secretion by parietal cells: Relative roles for calcium and protein kinase C, 98:244
Ampullary neoplasia: An endoscopic approach, 98:539, 1098
Asymptomatic primary biliary cirrhosis, identification of patients at risk for disease progression and death, 98:538, 1097

Bacterial translocation: Is it of clinical significance? 98:243
Barrett's esophagus: Too much acid, alkali, or both? 98:798
Biliary stricture: Is dilatation an acceptable alternative to operation? 98:1089
Biotin transport is regulated, 98:242
Calcium and gallbladder motility: Another piece in the puzzle, 98:801
Cyclosporine in Crohn's disease—Low doses won't do it, 98:1383
Cystic fibrosis gene, 98:535, 1094
Cytokines can make you sick—Or keep you well, 98:536, 1095
Decreased carnitine and increased ammonia—Which comes first? 98:1713
Endoscopic treatment of colonic angiodysplasia: The procedure was a success but....98:1386
Enteric neurons: Dogiel is outnumbered, 98:1716
Estrogen-induced gallstones in males, 98:800
ESWL for bile duct stones: Making waves in established therapy, 98:537, 1096
Gastric cancer and adenovirus, 98:799
Hepatitis B infection and the pathogenesis of hepatocellular carcinoma, 98:1711
Hoarseness and gastroesophageal reflux: What is the relationship? 98:1717
How does the schistosome evade host defenses, 98:1712
Interferon treatment of chronic non-A, non-B (HCV) hepatitis: The saga continues, 98:1384
Is oriental folk use of bear bile vindicated (yet)? 98:1090
Jejunoileal bypass: Can the mistake be corrected, 98:1710
Liver biopsy shown useful in work-up of patients with chronically abnormal 'LFTS''—still, 98:797
The load-to-length principle in the inhibition of gastric emptying by intestinal feedback, 98:1387
Look at the duodenum in familial polyposis, 98:1092
Pathogenesis of duodenal ulcer, 98:1388
Postdissolution gallstone recurrence: A lifetime sentence to the rock pile or not? 98:241
Preventing a hot gallbladder: Promising new application of a new drug, 98:240
Protein kinase C unleashed, 98:1091
Radiographic imaging to predict gallstone dissolution: More than meets the eye, 98:1715
Revolutionary lifesaving therapy for acute hepatic failure, Or yet another false hope? 98:1088
Role of atrial natriuretic factor in early cirrhosis, 98:245
Serotonin
blockers, and MPTP-induced duodenal ulcers (rat), 98:554
in sigmoid colon in severe constipation, 98:1219
Sexual dysfunction, in alcoholic cirrhotic men, 98:1730–c
Shock-wave lithotripsy
for bile duct stones, 98:537–ss, 1096–ss
gallstone therapy, 98:392, 806–c
piezoelectric lithotripsy, for gallstones, 98:777–cr
Siderosis, extrahepatic, fetal liver disease, and neonatal hemochromatosis, 98:1699–cr
Sigmoidoscopy, flexible, with air contrast barium enema, vs. colonoscopy, for lower gastrotintestinal bleeding, 98:855
Skin, and colon and bile duct, shared Mr 40,000 epitope, 98:464
Sodium
countercurrent multiplier in intestinal villus (dog), 98:3
in gastrointestinal lavage, 98:11
transport, in colon cancer (mouse), 98:1502
Somatostatin, and gallbladder volume and small intestinal motility, 98:316
Somatostatin-28, carbohydrate, fat, and protein effects on release, 98:633
Sonography, *CT and Sonography of the Acute Abdomen*, 98:543–br
Sphincter
internal anal, in fecal incontinence, 98:1103–c
of Oddi, cyclic motility, translocation of papilla (opossum), 98:347
pancreatic and bile duct (cat), 98:758
Sphincterotomy, duodenoscopic, for duct stones, follow-up study, 98:1008
Spleen, in inflammatory pancreatic disease, 98:509
Spondylarthritis, ileocolonoscopy, 98:1105–c
Spondylarthropathy, seronegative, ileocolonic lesions, 98:1730–c
Stomach
antral mucosectomy, L-364,718, and atropine effects on secretion (dog), 98:47
aspirin effects, prostaglandins and mucosal damage (monkey), 98:284
cancer
and adenovirus, 98:799–ss
clinical and morphological characteristics, 98:708
epidermal growth factor receptors, 98:961
Gastric Carcinoma: Classification, Diagnosis, and Therapy, 98:1397–br
point mutations of *ras* oncogenes, 98:955
capsaicin protection against deep mucosal damage (rat), 98:838
enterochromaffinlike cells, gastrin trophic effects (rat), 98:33
M3 muscarinic receptors mediating acid secretion (rat), 98:218
macromolecular uptake, effect of divalent hapten-induced intestinal anaphylaxis (mouse), 98:894
misoprostol effects on cell migration and transit (dog), 98:90
mucosa
ASA/NSAID damage, arbaprostil therapy, 98:1549
aspirin effects analysis with phospholipid-selective cytochemical stain, 98:592 on prostaglandins, fish oil role, 98:586
ethanol-induced injury glutathione effects (rat), 98:1452 neutrophils and xanthine oxidase-derived radicals (rat), 98:909
histamine metabolism, pentagastrin effect, 98:921
and laparotomy (rat), 98:249–c
leukotriene effect on susceptibility to injury (rat), 98:1178
luminal surface hydrophobicity (dog), 98:361
of *Necturus*, intracellular pH regulation, 98:901
surface hydrophobicity in peptic ulcer disease, 98:1250
reflex relaxation, perception of gut distention, 98:1193
regeneration, protooncogene expression (rat), 98:1525
ulcers and prostaglandin E:0I2:0E synthesis, NSAID effects (rat), 98:1245
Stress
and gastric acid secretion (rat), 98:1490
and pancreatitis development (rat), 98:1682
and peptic ulcers, 98:252–c
Submucous plexus, in ileum, adrenergic and peptidergic nerves in diabetes (rat), 98:1427
Substance P, and intestinal function (ferret), 98:1509
Sucrase-isomaltase, in adult colon and colonic polyps, 98:1467
Sudan stain, and quantitative fecal fat, 98:1722–c
Sulfasalazine therapy, radical scavenger mechanism of 5–aminosalicylic acid, 98:1162
Surface mucous gel, gastric mucosa, luminal hydrophobicity, 98:361
Surgery, hepatocellular carcinoma resection, 98:733
Survival rates
asymptomatic primary biliary cirrhosis, 98:1567, 1707–cr
asymptomatic primary sclerosing cholangitis, 98:1594
gastric cancer, 98:708

hepatocellular carcinoma resection, 98:733
Swallowing, oropharyngeal, and deglutitive glottic closure, 98:1478

T lymphocytes
activation, and crypt epithelial cell proliferation and intestinal mucosal morphology, 98:1255
CD8:S+:E, activation antigen in viral chronic active hepatitis, 98:1029
in Crohn's disease, interleukin-2 receptors, 98:639
organ-specific suppressor cells, and autoimmune gastritis, 98:226
Taurine, and liver enzymes and bile acids in chronic hepatitis, 98:1044
Thermal injury, and small intestinal protein and nucleic acid synthesis (rat), 98:1445
Thromboxane, in inflammatory colitis (rat), 98:269
Thyrotropin-releasing hormone, and gastrointestinal motor function, 98:517
Tissue culture
colon cancer Caco-2 cells
alkaline phosphatase synthesis, 98:1199
vitamin B_{12} transport through monolayers, 98:1272
vitamin E uptake during lipolysis, 98:96
gastrinoma, morphology and physiology, 98:936
HepG2 cells, nude mouse model for hepatitis B virus, 98:470
intestinal epithelial cells, basement membrane role in differentiation (rat), 98:322
pancreatic cancer lines PANC-1 and MIA PaCa-2, growth effects of regulatory peptides, 98:1666
transfected fibroblasts, cell surface expression of hepatitis B surface and core antigens, 98:968
Toxic metabolites, in alcoholic pancreatitis, 98:1051
Transferrin receptor
in duodenal mucosa in iron overload, in genetic hemochromatosis, 98:976
in small intestine, effect of iron stores and erythropoiesis (rat), 98:576
Transit time
colonic, liquid vs. solid diets, 98:73
gastric, misoprostol effects (dog), 98:90
gastrointestinal, after ileal pouch-anal anastomosis, 98:111
Transplantation
bone marrow, jejunal vasculitis with protein-losing enteropathy, 98:1689–cr
liver
biliary cirrhosis recurrence, 98:1106–c
and chronic hepatocerebral degeneration, 98:1079–cr
and erythropoietic protoporphyria, 98:1726–c
risk factors for cytomegalovirus infection, 98:1326
Transport
bicarbonate, in duodenal mucosa, 98:867
bile acids, in ileum, diarrhea vs. constipation, 98:25
biotin, 98:242–ss
epidermal growth factor, in fetal small intestine (rat), 98:828
epithelial, in jejunum, effects of substance P and VIP (ferret), 98:1509
glucose in small intestine, preparation of brush-border membrane vesicles, 98:676
glutamine, intestinal, in diabetes (rat), 98:862
Hepatic Transport and Jaundice, 98:1720–br
ion, in inflamed jejunum (rat), 98:561
magnesium, in terminal ileum, interaction with calcium transport (rat), 98:985
sodium chloride, in colon cancer (mouse), 98:1502
vitamin B:0l12:0E, in Caco-2 monolayers, 98:1272
Triglycerides, ileal, and gastroduodenal motility and intragastric distribution of solid meal, 98:568
Tropical diseases, *Balliere's Clinical Tropical Medicine and Communicable Diseases. Diarrhoeal Diseases*, 98:247–br
Trypsin, meal-stimulated release, alcohol effects, 98:191
Tumor necrosis factor, and endotoxin in obstructive jaundice (rat), 98:478

Ulcerative colitis
experimental induction method (mouse), 98:694
folate supplementation, 98:544–c
with glomerulonephritis, 98:786–cr
in HIV infection, 98:544–c
immunoglobulin G1 and complement activation, 98:1264
Legionella infection, 98:1107–c
Pentasa maintenance treatment, 98:251–c
Ulcers
duodenal
MPTP-induced (rat), 98:554
omeprazole vs. ranitidine treatment, 98:278
pathogenesis of, 98:1388–ss
peptic
bleeding, comparison of laser, heater probe, and endoscopic therapy, 98:1239
Campylobacter Pylori in Gastritia and Peptic Ulcer Disease, 98:1101–br
and noxious stress and Campylobacter pylori, 98:252–c
pharmacotherapy of, 98:1724–c
surface hydrophobicity of gastric mucosa, 98:1250
stomach, NSAIDs effects (rat), 98:1245
Ulcer Disease: New Aspects of Pathogenesis and Pharmacology, 98:247–br
Ultrasonography, with extracorporeal lithotripsy, of bile duct stones, 98:726
Urinary bladder distension and contraction, and colonic motility (cat), 98:1148
Ursodeoxycholic acid
in biliary cirrhosis, 98:1090–ss
and liver enzymes and bile acids in chronic hepatitis, 98:1044
and lovastatin, reduction of biliary cholesterol saturation, 98:1572
and small intestinal absorption of bile acids, 98:424

Vagotomy, truncal, and CCK release, gallbladder contraction, and gallbladder sensitivity to CCK, 98:1338
Variceal hemorrhage, in cirrhosis, propranolol prevention of, 98:185
Vasoactive intestinal polypeptide (VIP)
in colonic smooth muscle, in Crohn's disease, 98:1437
immunoreactive neurons, projections in colon, 98:819
and intestinal function (ferret), 98:1509
and lymphocyte activation, 98:1693–cr
in nerve fibers of submucous plexus of ileum, in diabetes (rat), 98:1427
prepro- peptides, and ileal output, 98:505
Verner Morrison syndrome
prepro-VIP derived peptides, and ileal output, 98:505
VIP effects on lymphocyte function, 98:1693–cr
Vesicles
brush-border membrane, in small intestine, 98:676
liver plasma membrane, ethanol effects on alanine uptake (rat), 98:429
Viruses
and gastric cancer, 98:799–ss
hepatitis
B, nude mouse model, 98:470
delta, monomeric IgM antibodies, 98:1582
infections, and inflammatory bowel disease, 98:549
poliovirus type 1, entry through intestinal M cells, 98:56
Vitamin B_{12} transport, in Caco-2 cell monolayers, 98:1272
Vitamin E, Caco-2 intestinal cell uptake of, during lipolysis, 98:96
Vocal cords, and oropharyngeal swallowing, 98:1478

Water
absorption in ileum, additive effects of secretagogues (rat), 98:881
contamination, and esophageal cancer, 98:1141
countercurrent multiplier in intestinal villus (dog), 98:3
intestinal secretion, effects of substance P and VIP (ferret), 98:1509
transport, in large intestine, atrial natriuretic peptide actions (rat), 98:647

X antigen and antibody markers, in hepadnavirus infections, 98:1071
Xanthine oxidase
in ethanol-induced lipid peroxidation (rat), 98:203
radicals, in ethanol-induced injury to gastric mucosa (rat), 98:909

Yersinia enterocolitica, and small intestinal ultrastructure (rabbit), 98:1401

Zollinger–Ellison syndrome
progastrin in, 98:1420
reflux esophagitis, 98:341
